

To: RTBU Infrastructure Members – Sydney Trains

Sydney Trains Infrastructure Network Maintenance Position Description Review

Congratulations to members who sent an email to futureNMD@transport.nsw.gov.au requesting draft position descriptions include track changes.

Following this action members secured an agreement from Management that position descriptions will be released with the proposed changes visible through track changes. This will allow members to fully understand and digest what is being proposed.

Please contact your Workplace Delegate or Organiser for a copy

Despite the evidence that the proposed changes will significantly impact members, Management have ignored a proposal that this position description review take place as part of the Sydney Trains Enterprise Agreement process.

Instead, Management has tried to make the workforce responsible. They expect **YOU** to provide them with all the information **first** while failing to commit to recognising these changes at the Enterprise Agreement level.

To consider our next action, RTBU Officials will be holding workplace meetings at each network-base throughout February 2021. At these meetings, members will discuss and decide our next steps.

For further information, please contact your workplace delegate or Branch Organiser Wayne Moody on 0499 710 707 or email wmoody@rtbu-nsw.asn.au
